### DETAILED ACTION

1. This application is in condition for allowance except for the presence of claim 14 directed to a species non-elected without traverse. Accordingly, claim 14 has been cancelled.

#### *Allowable Subject Matter*

1. Claims 1-13,15-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Independent Claim 1, is allowable over the prior art of record since the cited references taken alone or in combination do not teach or suggest: *a bit sequence containing several interspersed bit-group sets that each contain a plurality of series that have servo sectors consecutively-placed between data sectors, wherein all of the servo sectors in each bit-group set includes bit-groups having identical bits.*

Independent Claim 15, is allowable over the prior art of record since the cited references taken alone or in combination do not teach or suggest: *the bit sequence containing several interspersed bit-group sets that each contain a plurality of series that each consist of several circumferentially consecutive identical bit-groups, wherein each of the bit-groups resides in a respective nominally-contiguous digital portion of a respective servo sector, each digital portion is bound by two respective non-digital portions of the respective servo sector occupying a total area A, each of the bit groups occupying a smaller area B.*

Independent Claim 25, is allowable over the prior art of record since the cited references taken alone or in combination do not teach or suggest: *one track and at least one cyclic bit sequence, the bit sequence containing multiple interspersed bit-group sets that each contain a plurality of series that have servo sectors consecutively-placed between data sectors, wherein all of the servo sectors in each bit-group set includes of identical bit-groups having identical bits distributed along the track, in which the identical bit-groups reside in selected consecutive ones of the servo sectors.*
